# Coliban System Northern

Your monthly supply system update | 1Sep 2025

# The Coliban System Northern supplies the following towns:

- Axedale
- Bendigo
- Heathcote
- Huntly
- Marong
- Raywood
- Sebastian
- Toobarac

The towns can be supplied from our storages on the Coliban River, Lake Eppalock or the Waranga Western Channel via the Goldfields Superpipe.

Water summaries are prepared each month to provide current water resource information.

Our urban water strategy outlines our water supply initiatives to meet our region's residential, business and community water needs for the next 50 years.

For more information visit our website, coliban.com.au

# Available raw water supply

Available allocation <sup>1</sup>	Lake Eppalock (our share)	Our storages <sup>2</sup>	Total available
31,943 ML	32,887 ML	2,599 ML	67,429 ML

- 1. Does not include allocation held in spillable water account or spill.
- 2. Includes Sandhurst and Caledonia Reservoirs, but not reservoirs on the Coliban River.

The graph below shows the raw water 12-month supply and demand outlook for the Coliban System Northern.

# **Lake Eppalock**

We have an 18% share of the inflows and capacity of Lake Eppalock. We can access up to 17,440 ML per year averaged over three years from our share of Lake Eppalock.

### **Water shares volume**

We also hold water shares in the Goulburn and Murray Systems managed by Goulburn-Murray Water.

### Goulburn

- 23,232 ML High Reliability
- 2,861 ML Low Reliability

## Campaspe

- 2,591 ML High Reliability
- 646 ML Low Reliability

# Spillable water

Allocation held above entitlement volume is quarantined in a spillable water account until the resource manager for northern Victoria declares a low risk of spill.

## **Allocation trade**

Seasonal allocation against water shares can be traded on the water market into and out of this system.

### Carryover

Up to 100% of unused allocation may be carried over for use in the following year.

# **Water restriction outlook**

The forecast supply is assessed against the average annual demand to determine the need for restrictions. We aim to maintain 12 months' supply in the Coliban Northern System.

Permanent Water Saving Rules (PWSR) currently apply.

## **Rural allocation**

Allocations for rural customers of 30% were announced on 1 July 2025. Allocations can increase if the water resource position improves.

# Allocation trade and Superpipe pumping

Trade for month	Trade to date <sup>3</sup>	Pumping for month <sup>4</sup>	Pumping to date <sup>4</sup>
0 ML	0 ML	1,464 ML	2,124 ML

- 3. Allocation traded into and out of this system this year
- 4. Pumped from the Waranga Western Channel or Lake Eppalock to Sandhurst Reservoir

# **Demand comparison**

The graph below shows cumulative water use for the Coliban Northern System compared with the same period last year and estimated demand. The use and demand include urban, rural and system losses.

# Coliban System Northern cumulative use comparison

# Monthly use by towns

The graphs below show this month's water use for each water treatment plant supplied in the Coliban System Northern compared with the same period last year.

# Coliban System Southern

Your monthly supply system update | 1Sep 2025

# **The Coliban System Southern** supplies the following towns:

- **Elphinstone**
- Castlemaine
- Fryerstown
- Guildford
- Harcourt
- **Kyneton**
- Maldon
- Newstead
- Malmsbury
- **Taradale**
- Tylden

Raw water is sourced from our Coliban River catchment storages: Upper Coliban, Lauriston and Malmsbury Reservoirs, located near Kyneton.

Water Summaries are prepared each month to provide current water resource information.

Our Urban Water Strategy outlines our water supply initiatives to meet our region's residential, business and community water needs for the next 50

For more information visit our website coliban.com.au

Our storages <sup>1</sup>	Passing flow account	Holding basins (McCay and Bakers Creek)	Total available	
41,319 ML	382 ML	1,617 ML	42,556 ML	

1. 1. Includes Upper Coliban, Lauriston and Malmsbury Reservoirs

The graph below shows the raw water 12-month supply and demand outlook for the Coliban System Southern

# **Water restriction outlook**

The forecast supply is assessed against the average annual demand to determine the need for restrictions.

We aim to maintain 24 months' supply in the Coliban Southern System.

Permanent Water Saving Rules (PWSR) currently apply.

### **Rural allocation**

Allocations for rural customers of 30% were announced on 1 July 2025. Allocations can increase if the water resource position improves.

# **Demand comparison**

The graph below shows cumulative water use for the Coliban System Southern compared with the same period last year and estimated demand. The use includes urban and rural demand and system losses.

# Monthly use by town

The graphs below show this month's water use for each water treatment plant supplied in the Coliban System Sothern compared with the same period last year.

# Coliban catchment inflows

The graphs below show the inflow to our major storages on the Coliban River this month, compared with the same period last year; and cumulative inflow compared to the cumulative median inflow (1975 to 2022) for the same period.

# Goulburn System

Your monthly supply system update | 1Sep 2025

# The Goulburn System supplies the following towns:

- **Boort**
- Dingee
- Jarklin
- Lockington
- Macorna
- Mitiamo
- Mysia
- Pyramid Hill
- Rochester
- Serpentine

Raw water is supplied from the Waranga Western Channel, which is managed by Goulburn-Murray Water.

Water Summaries are prepared each month to provide current water resource information.

Our Urban Water Strategy outlines our water supply initiatives to meet our region's residential, business and community water needs for the next 50 years.

For more information visit our website coliban.com.au

Carryover	Allocation	Spillable water <sup>1</sup>	Allocation trade	Use to date	Total available
516 ML	1,866 ML	0 ML	0 ML	85 ML	2,297ML

1. Includes allocation held in spillable water account and spill.

The graph below shows the raw water 12-month supply and demand outlook for the Goulburn System.

## **Bulk entitlement volume**

2,420 ML per year

Our Goulburn System Entitlement has a very high reliability of supply.

### **Water Allowance**

60 ML per year

Our water allowance has the same reliability as high reliability water shares in the Goulburn System.

# **Spillable Water Account**

Allocation held above entitlement volume is quarantined in a spillable water account until the resource manager for northern Victoria declares a low risk of spill.

### Carryover

Up to 100% of unused allocation against the bulk entitlement may be carried over for use in the following year.

## **Allocation trade**

Seasonal allocations against bulk entitlements can be traded on the water market into and out of this system.

# Water restriction outlook

The forecast supply is assessed against the average annual demand to determine the need for restrictions. We aim to maintain 12 months' supply in the Goulburn System.

# **Demand comparison**

The graph below shows cumulative water use for the Goulburn System compared with the same period last year and estimated demand.

# Monthly use by town

The graphs below show this month's water use for each water treatment plant / town in the Goulburn System compared with the same period last year.

# Loddon Wimmera System

Your monthly supply system update | 1Sep 2025

# **The Loddon Wimmera System** supplies the following towns:

- Bealiba
- Borung
- Bridgewater
- Dunolly
- Inglewood
- Laanecoorie
- Korong Vale
- Tarnagulla
- Wedderburn
- Wychitella

Supply is primarily drawn from the Wimmera Mallee Pipeline and South-West Loddon Pipeline which are managed by Grampians Wimmera Mallee Water.

Bridgewater and Laanecoorie water treatment plants can also be supplied from the Loddon River.

Water Summaries are prepared each month to provide current water resource information. Our Urban Water Strategy outlines our water supply initiatives to meet our region's residential, business and community water needs for the next 50 years.

For more information visit our website coliban.com.au

Carryover	Allocation	Allocation trade	Spillable water <sup>1</sup>	Use to date	Total available
54 ML	526 ML	0 ML	0 ML	100 ML	480 ML

1. Includes water held in spillable water account and spill.

The graph on the below shows the raw water 12-month supply and demand outlook for the Loddon Wimmera System.

## **Entitlement volume**

- 300 ML Wimmera Bulk Entitlement
- 110 ML Off-season water allowance
- 820 ML Loddon Bulk Entitlement

The maximum volume that can be held under the Loddon BE is 100% of entitlement including carryover i.e. 820 ML.

# Spillable Water Account

Allocation held above entitlement volume is quarantined in a spillable water account until the resource manager for northern Victoria declares a low risk of spill.

## Carryover

The maximum volume that can be held under the Loddon BE is 100% of entitlement including carryover i.e. 820 ML.

Carryover against the Wimmera Bulk Entitlement is unlimited.

## **Allocation trade**

Seasonal allocation against bulk entitlements can be traded on the water market.

### Water restriction outlook

The forecast supply is assessed against the average annual demand to determine the need for restrictions. We aim to maintain 12 months' supply in the Trentham System.

Permanent Water Saving Rules (PWSR) currently apply.

# **Demand comparison**

The graph below shows cumulative water use for the Loddon Wimmera System compared with the same period last year and estimated demand.

# Loddon Wimmera System Cumulative use comparison

# Monthly use by town

The graphs below show this month's water use for each water treatment plant or town supplied in the Loddon Wimmera System compared with the same period last year.

# **Murray System**

Your monthly supply system update | 1Sep 2025

# Cohuna 🧬 Leitchville Gunbowei **Murray River** Legend Potable Water Echuca Raw Water

# The Murray System supplies the following towns:

- Cohuna
- Echuca
- Gunbower
- Leitchville

Water is sourced from the Murray River where flows are regulated by Goulburn-Murray Water.

Water Summaries are prepared each month to provide current water resource information.

Our Urban Water Strategy outlines our water supply initiatives to meet our region's residential, business and community water needs for the next 50 years.
